

Detailed program of the course ***PAILLE COUSUE MACHINE***

From April 13 to April 16, 2027 - 4 days - 32 hours

From April 26 to April 29, 2027 – 4 days – 32 hours

General objective : Adjusting the machines and introducing the different sewing techniques for Zan straw and natural straw by machine.

Making a tube, a strip, a blade, a button by hand, straw hats (natural, Zan and Sisal) sewn by machine (molding according to square or ball cap, finishing).

Target audience : milliner, dressmaker,

Prerequisites : be introduced to the work of molding a hat, know how to sew and have a chainette straw sewing machine (ANITA straight stitch model)

Trainer : Jean-Pierre TRITZ

Teaching methods :

The entire method aims to give the trainee maximum autonomy when repeating the gestures covered during training and to promote their future development.

The proposed method is essentially based on practice.

- Through the design and realization of a project and according to precise specifications, the trainee learns by practicing the basic gestures of the work for the realization of custom hairstyles.
- The specifications guarantee the acquisition of the techniques necessary for the work, provides the means to use the appropriate tools and methods.
- The trainer helps the trainee in the development of his/her personal project, will be able to guide him/her according to the technical feasibility, taking into account the time allotted.
- The trainer checks and corrects the learning of each technical step by the trainee.
- Any achievements made by the trainees will be used by the trainer to discover specific techniques, analyze difficulties and solutions to be provided.

First day : work on SISAL straw

- Explanation of the job
- Learning the machine and its settings
- Cotton or synthetic thread
- Learning sewing techniques
- Demonstration and execution
- Making a tube, a strip, a blade
- Making the button by hand - by machine
- Wetting the natural straw for the next day

Second day : work on natural straw

- Natural straw: button (hand) - machine setting
- Demonstration on square / ball cap
- Execution
- Work on square / ball cap
- Preparation if possible

Third day : work on ZAN braid (Tressa)

- Ironing the shapes made the day before
- ZAN straw: ball cap and brim according to model
- Work on the straps and studs
- Preparation

Fourth day

- Making hats, material and shape chosen by the trainee
- Making hats in the empty (without mold)

Note:

The assembly and finishing of the hats will be done outside the course, the goal being to master the techniques of sewing straw braids.

Teaching materials used for the training :

Paper support

Assessment methods :

Assessment sheet of acquired knowledge completed at the end of the course by the trainer and the trainee.

The training center issues, at the end of the course, a certificate of completion of training as well as a training certificate.

Training center :

Atelier-Musée du chapeau
31, rue Martouret
42140 Chazelles-sur-Lyon
FRANCE

SIRET number : 325 908 143 000 28

Registration number : 82 42 010 7842
