

Detailed program of the course ***PAILLE COUSUE MACHINE PERFECTIONNEMENT***

General objective : deepening the work of sewing straw by machine using other materials on personalized projects

Requirement : know how to sew straw by machine

Educational means :

The entire method aims to give maximum autonomy to the trainee when repeating the actions covered during training and to promote their future development.

Trainer : Jean-Pierre TRITZ

The proposed method is essentially based on practice.

- Through the design and realization of a project and according to precise specifications, the trainee learns by practicing the basic work gestures for the creation of tailor-made hairstyles.
- The specifications guarantee the acquisition of the techniques necessary for the work, provide the means for using the tools and appropriate methods.
- The trainer helps the trainee in carrying out their personal project and can guide them according to technical feasibility, taking into account the time allotted.
- The trainer checks and corrects the trainee's learning of each technical step.
- Any achievements made by the trainees will be used by the trainer to discover specific techniques, analyze difficulties and solutions to be provided.

Day one : technical reviews

- Review of machine settings
- Resumption of basic sewing techniques

Second day : work on fine natural straw (4/5 mm), flat horsehair and other materials brought by the trainees

- Choice of materials
- Demonstration on a cap
- Execution
- Board - demonstration - execution

Day Three : Working on Custom Models

- Choice of model(s) according to the trainees
- Demonstration and execution

Educational materials used for training :

Paper, board, etc.

Evaluation methods :

Acquired assessment form completed at the end of the internship by the trainer and the trainee.

The training center issues, at the end of the course, a certificate of training completion as well as a training certificate.
